

INDIAN SOCIETY OF CLEFT LIP, PALATE AND CRANIOFACIAL ANOMALIES

“ISCLPCA Fellow”

Background and Philosophy: Though India has many high volume centers, there is very little clinical research being done in proportion to the clinical material available. Without clinical research and looking at the outcome, the scope of improving quality care and improvising new protocols is limited. In addition, there is paucity of fund to support these young professionals who are keen to do research. Keeping this in mind, it was decided to institute a grant for the Research Fellowship.

The Research Project will be of Clinical research and not basic science research.

S.No	Item	Explanation
1	Name of the Fellowship	<i>“Cleft 2017 Clinical Research Fellowship awarded by ISCLPCA”.</i>
